Art Unit: 1209

The amendment filed September 8, 1997 has been received.

The status of SN: 08/440,428, filed May 12, 1995, should be indicated in the specification.

As, per a restriction requirement set forth in paper number 6 of parent application S. N. 08/440,428, Applicants elected the invention of Group I, claims 2-5 and 10-12 and the specific compound imidoclopid. The restriction requirement as set forth in said paper number 6, and the election made in response to said requirement is adhered to.

Claims 13 and 14 are withdrawn from further consideration as being drawn to a nonelected invention.

Claims 2-5 and 10-12 are acted upon on their merits to the extent that they read on the elected invention.

Claims 3 and 4 are improperly dependent upon more than one claim. Correction is requested.

The term "non-systemically" (claim 10, line 2) should be changed to "topically" to put said claim in better form.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was

Serial Number: 08/925,372 Page 3

Art Unit: 1209

commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a)

Claims 2-5 and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kristiansen et al.(A), Shiokawa et al.(B), Elbert et al. (AT) and Derwent Abstract of JP 03,279,389 (AR"), all of record.

The prior art teaches that the claim designated pyridinylmethyl-imidazolidinium compounds, analogues, and isomers thereof are known insecticides, effective against insects of the type claimed. The Elbert et al. Reference, page 22; the Shiokawa et al. Reference, col 4, lines 62-67; and the Kristiansen et al. Reference, col. 4, lines 10-23 further teach that the claimed compounds, isomers and analogues thereof are non-toxic to animals, fish, birds, etc. Therefore, one skilled in this art would find ample motivation from the prior art supra to use the claimed compounds as insecticides applied to humans or animals to combat the target insects of the instant application with a reasonable expectation that said compounds would be safe and effective. Thus, no patentable distinction can be seen between the claims of record and the state of the art as taught by the prior art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen Robinson whose telephone number is (703) 308-4524.
